Flexible Formworks World Map

This map, originally started by Ronnie Araya from the University of Manitoba, Canada, shows you where in the world people interested in this unique forming method are researching and designing structures using flexible formwork to shape materials such as concrete, plaster and composite type materials. It has now been updated and is being maintained by this website. If you are interested in identifying your design-work or research interests on this map please send your information to: FabWiki Webmaster

NOTE: SELECT ICON NEXT TO TITLE FOR LEGEND.
